

DISASTER RECOVERY (DR) SOLUTION

UNIT 10 SEMINAR ACTIVITY

XUE LING TEH

WARM STANDBY, ACTIVE PASSIVE SOLUTION

- RPO = 1 hr
- RTO = 8 hrs
- High Availability (HA) required

According to the above RPO and RTO targets, a warm standby (active-passive) solution is appropriate. Two systems are constantly deployed and kept updated, with one being passive on standby, which would save running costs such as utility. Having a regular backup, or even shared storage also satisfies the HA requirement.
